```

The diagram shows a class hierarchy. At the top is the 'UBlueprintFunctionLibrary' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the other two are empty. Below it is the 'UPyranoBlueprintLibrary' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains two static methods: '+ static bool SavePlanWithDialog(const FSimConfig &Config)' and '+ static bool LoadPlanWithDialog(FSimConfig &OutConfig)'. A blue arrow with an open triangle head points from the top of the 'UPyranoBlueprintLibrary' class to the bottom of the 'UBlueprintFunctionLibrary' class, indicating that 'UPyranoBlueprintLibrary' inherits from 'UBlueprintFunctionLibrary'.
